OTHER BENEFITS

We link your tour into our database, currently generating over 4,000,000 visitors.

You receive a free CD with all digital 'still' photography.

You can be linked into the national resource site www.travel-pal.com

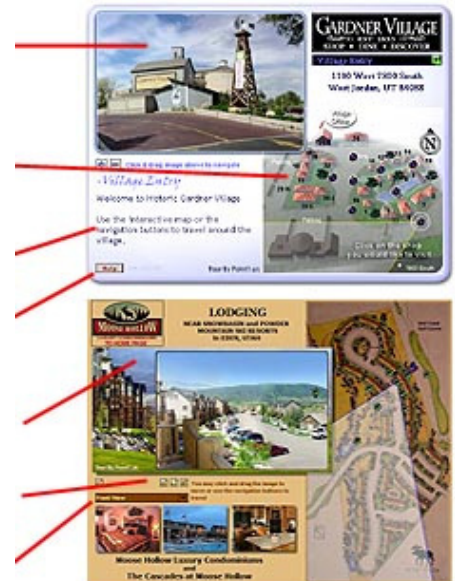

Point1.us Virtual Tour Overview

Every few years, science offers us technology that changes the way we see the world around us. I'm very happy to introduce an innovative way to have millions of people walk through your city without leaving a single footprint.

Interactive online walk through tours or "Virtual Tours" have been rapidly expanding in the real estate, hotel and travel industry. People love to touch and feel and 'be there' as much as possible. Now you have the tools available to bring the world to your doorstep and then let them in for a walk around!

All of our tours have features like...

- An interactive viewing window. Click and drag to control.
- Interactive map with 'Radar Effect' and navigation buttons.
- Picture by picture descriptions.
- In tour help system.
- Each tour is designed to match your website's look and style.
- Navigation 'Zoom' and 'Play' buttons.
- Several menu system options.

For over 11 years our company has improved and added to the interactive tour concept. We now have a large database of tours, from ski resorts and condominiums to museums, golf courses and even airports. Now your clients can not only control 360 degree images of each room or area, but have "Doorway Buttons," allowing them to 'Slide' from area to area within the picture. We also create an interactive digital map or floor-plan with navigation buttons to help you travel easily. You also have a "Radar Effect" which moves with you on the map and shows the direction you're facing and what is in your view range. This really helps you keep track of where you are during the tour.

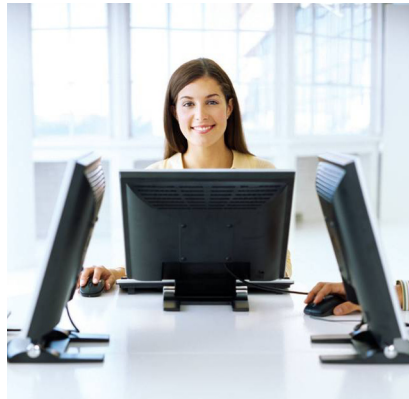

All of our tours include pull-down menus, help systems, zoom, pause, play movie buttons and screen by screen descriptions, all to enhance clarity and interest to the online experience. We can also provide live narration for each area.

Our Partners:

We now have partnerships as well, with companies like Travel Pal International, who provides travelers with resources like national listings of hotels, restaurants and local attractions as well as maps coupons as well as online and high volume distribution booklets. We're also proud to introduce... 'Flying Sensors' who produces high quality videos with state-of-the-art equipment, including radio controlled mini helicopter cameras that can even fly indoors.

Service Features & Benefits

Our company not only provides you with an interactive tour, but we also manage and maintain it. This means that your tour will always be updated with the current technology and compatible with new browsers and viewers.

Our live, local Tec-support is always ready to update information or change the look of your tour to match a new website look, with no additional cost. We also provide you with tracking information whenever you would like, showing by 'Hits' or 'Page views' the volume of visitors coming to your tour.

Our interactive tours are also very easy to update and edit. This is a great benefit over video. This method allows us to update single areas or panoramic images, as your locations are remodeled or rebuilt without re-filming a whole video and reworking the audio, saving you money over time.

We promote your tour through our site and link you into the cross traffic coming from the other existing tours. Our website generates over 4,000,000 visitors each year; 98% from the tourism and travel industry, and you benefit from our traffic by simply being in our database.

Virtual tours have been a time tested resource. Our real estate clients have mentioned for years that they save time and money by first walking their client through the homes online before driving from location to location.

We're proud to have an astounding loyalty rate with our clients, over 95% of our original 11+ year clients are still members of our database (The Armstrong Mansion, Sandy Parks & Recreation, Alta Ski Resort, Gardner Village, Murray City Parks, West Valley City, Richfield City, Tooele County Eco. Dev. North Salt Lake City etc...) This has been a great testament to us of our usefulness and service.

Cost:

Each tour, including the features shown above comes with an average one-time charge of \$950.00.

Many of our clients have said "If we could only get people to see what we have, then I know we could bring in more visitors." That's exactly what we do for you. I hope we can provide a useful tool that keeps people on your website longer and allow them to 'walk around' your city and facilities from anywhere in the world.

Thank you for your interest and for your time. Please feel free to call or email if you have any questions.

TECHNICAL SUPPORT

We're always here for your convenience, and only a phone call or email away

ZERO DOWNTIME

Our service uses only the most reliable ISP and we have never been down in over 11 years!
